PLANS TO COLLECT TAX ON INCOMES

They must be, to avoid penalties, in the hands of the collector of revenue the profess March 1. further penalization, and prepare their returns to show the amount of income on or before March 1.

There is some question whether inomes for the year 1914 are going to make the showing predicated by returns of the preceding ten months and the first period of the present income tax. There is a suspicion that many incomes have been shaved down by business inactivity due to war con-ditions. This remains to be shown con-clusively. Also, if incomes are smaller tusively. Also, if incomes are smaller where they have been greater, it is expected that the tax will be reduced considerably by a possible instinct to save the amount of the tax to already depleted pocketbooks, and also to ques-tion liabilities that would be paid out of hand in flush times.

Joshua W. Miles is collector for the Maryland internal revenue distinct, in which Washington is located, to whom eturns of incomes are to be made. Reports have so far come slowly into he Washington office of the collector of internal revenue, perhaps indicative of a reluctance to make showdowns of educed increment, and suggestive of decreased collection basis. While the income returns are to be ade before March 1, the tax need not

the paid in until June 30. Bills are sent out imposing the tax as soon as returns are checked up and the amount of tax estimated. If these bills are not paid by June 30 there are rocks shead for the delinquent. Also those who have incomes that are subject to tax and fail to return the amount of such incomes are in even worse fix if it is found out. And the internal revenue service has ample machinery for finding out just such things about a man's private gains, and is disposed to start the wheels on suspicion. paid in until June 30. Bills are

start the wheels on suspicion. About 30,000 people in the entire col-ction district, which also includes the state of Delaware and the two eastern shore counties of Virginia, have been notified of the imminence of the tax-collection period and requested to make returns. How many are liable to tax the collector of revenue is unable to estimate, either for the entire district or for its integral parts. Those who have not received notice or blank forms for returns, and who are in receipt of adequate incomes, are relieved of liability either to make returns or to pay the tax. The full responsibility is theirs, as may be discovered to their cost.
